**DETAILED ACTION**

1. This communication is responsive to the amendment dated 10/12/2004.
2. Newly submitted claim 38 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the newly added limitation of “the battery is substantially permanently affixed within the housing” is not originally claimed.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 38 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1-6 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saltykov (U. S. Pat. - 6,681,021).

Regarding claim 1, Saltykov discloses a hearing aid, comprising a first half shell; a second half shell (Col. 3, lines 39-40) attached to the first half shell to form a housing (2) fitting into a user's ear canal; a plurality of conventional electrical components mounted within a housing formed by shells (Fig. 1); and securing means as claimed. But Saltykov does not clearly teach that a flexible tip as claimed. Since providing a desirably flexible tip for a hearing aid is

Art Unit: 2643

very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a suitable flexible tip for the hearing aid as an alternate choice, in order to provide users a rather comfortably fitted hearing aid.

Regarding claims 2-3, Saltykov does not clearly teach an interlock-joint securing means as claimed. Since providing securing means for firmly locking two half shells of the hearing aid housing is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a suitable securing means, such as an interlocking joint for securing both shells together as an alternate choice, in order to effectively and efficiently manufacture the hearing aid.

Regarding claims 4-5, Saltykov does not clearly teach a microphone retainer as claimed. Since providing an acoustic filter for mounting a microphone into a hearing aid is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide a suitable acoustic filter, such as a foam cushion for mounting a microphone into a hearing aid housing, in order to reduce some undesirable vibrations.

Regarding claim 6, Saltykov does not clearly teach a mushroom shaped tip as claimed. Since providing a mushroom shaped cerumen trapping tip for a hearing aid is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention was made to provide the mushroom shaped tip for the hearing aid housing, in order to trap cerumen from user's ear canal and make the hearing aid more durable.

Regarding claim 9, Saltykov does not clearly teach an adhesive agent as claimed. Since providing a desirable adhesive agent to seal a hearing aid housing members is very well known in the art, it therefore would have been obvious to one skilled in the art at the time the invention

Art Unit: 2643

was made to provide a suitable adhesive agent for sealing or further sealing the housing members of the hearing aid as an alternate choice, in order to reduce some undesirable vibration and also make the hearing aid more durable.

4. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saltykov (U. S. Pat. - 6,681,021) in view of Reiter et al. (U. S. Pat. - 5,606,621).

Regarding claims 7-8, Saltykov does not clearly teach a receiver as claimed. Reiter et al. disclose a similar structured hearing aid, comprising an interchangeable tip (18, 22) having a receiver (20). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide the receiver taught by Reiter et al. for the tip of the hearing aid as an alternate choice, in order to deliver an acoustic output to the user more efficiently and effectively.

#### ***Response to Amendment***

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL

Art Unit: 2643

EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
